Weekly Work Planners

Weekly work planners will once again be going home in Thursday Folders. Please remember to look over the weekly planner and discuss the achievements and areas of improvement with your student. The work plan not only helps keep students focused and on track but it is a great reflective tool as well. **WORK PLANNERS ARE DUE BACK TO CLASS SIGNED BY THE FOLLOWING WEEK!**

Science Fair/Pancake Breakfast

The science fair and pancake breakfast were originally scheduled for February 11th. Due to some unforeseen circumstances, it has been moved to Saturday, February 25th. This change in date will allow for a couple more weeks to make that science fair project top-notch! Science projects are due on Friday, February 24th in the morning. Students will present their project to the class throughout the day. Projects are available for pickup after the fair or on Monday. The pancake breakfast is also a fantastic event to participate in. The fellowship hall will be open for pancakes at 8:30 until 10:00. The classrooms will be open for the viewing of science projects from 9:00-12:00. Hope to see you here!

Gotcha Slips

Each and every day, students work hard, make good choices and set positive examples for other students for other students to follow. To help encourage students to keep making these good choices, we are handing out Gotcha Slips. This small token of appreciation goes a long way. In the Aquamarine class, when a student earns a Gotcha Slip, they will be entered in a weekly raffle for a chance to go to the prize box.

Accelerated Math

Accelerated math has been a part of our daily curriculum since the beginning of the year. Each Thursday the students' work and TOPS reports are sent home in the Thursday folders. We encourage you to go over these TOPS reports with your student and discuss the achievements and areas for improvement. It would be great practice for the students to go over the incorrect answers and discuss how they came up with the correct answer. If you have any questions about the reports or what your student is working on please let me know.

Accelerated Reader

Accelerated Reader is another fantastic component of our curriculum that can enhance your students reading comprehension. Students are encouraged to take a practice reading quiz on books that they have read themselves or a book that has been read to them as well. Discuss with your student what quizzes they have taken and ones they still need to take.

Rosetta Stone

As a reminder, students have the ability to work on Rosetta Stone at home! All you need to do is log on to the CMP website, select the Elk Grove campus, and under Technology Links, select Rosetta Stone. If your student doesn't remember their password and username, we can always send it home. This is a great way to get some extra practice time in!

Plastic Utensils Needed

Spelling Test Tomorrow!

Minimum Day 1/27 Dismissal @ 11:45

Report Cards Dispersed
